Reduce costs, increase profits, and mitigate your business risk with our Flat-Rate Managed Services

Our flat-Rate IT Support and network consulting services help your organization regain lost productivity through our unlimited computer help desk, network support, server monitoring, onsite support, and Vendor Management Services. We minimize your downtime through our continuous Network Monitoring Service, which alerts us proactively to potential problems before they occur.

Our Managed IT Services allow you to focus on running your business, not your network.

Is Flat-Rate Complete Care IT Outsourcing the right choice for you?

We dramatically improve efficiencies for businesses in the New York, New Jersey and Connecticut area from 10 to over 150 PCs, and reduce their overall computer support costs. We provide pertinent information for organizations to budget their IT costs accurately each and every month.

Welcome

If you are a new client to EZ MSP, we would like to invite you to sign up for a Network Audit where one of our senior computer consultant will come onsite and perform computer assessment to pinpoint any vulnerabilities to viruses, hackers, data backup, or spyware and to show you how you can get better performance, speed, reliability, and LIFE out of your existing computer network.

We offer the network audit service as a gift to all new prospective customers with 20 or more computers. This will give you a chance to get to know us better without any cost or risk on your part

[Click here](#) to learn about signing up for a FREE Network Audit and Assessment.
